

BANDOLERO EXHAUST SYSTEM UPDATE #6326-1

US Legend Cars has a new supplier of the Bandolero header pipes. These header pipes will have a flared end (engine side), with a separate bolting flange (not welded to the header pipe). They are approximately 1/4" – 1/2" longer than the previous supplier.

These headers, and all Bandolero headers, must remain stock as delivered by US Legend Cars.

Both the "older style" and the "newer style" header pipes are legal to use at all INEX sanctioned events.
