LEGEND CAR BRAKE CALIPER REMINDER,

Legend Car brake calipers must remain tight to the brake caliper bracket and the brake caliper brackets must remain tight to the spindle & rear end housing mounting points, as delivered from US Legend Cars International.

“Floating” the brake caliper in any way, is not permitted.

If an INEX Inspector checks your brake components & the caliper is loose, you will be subject to a disqualification.

Thank you for your cooperation.

Scott Reinhardt (INEX General Manager)
